

## Project: Urgent Care Center Self Check-In Web App Wireframe

### Description:

This mid-fidelity wireframe project for a self-check-in web app at an Urgent Care center was created using Whimsical. Initially designed as a low-fidelity wireframe on paper, the project outlines a streamlined check-in process that collects essential patient information such as personal details, emergency contacts, billing info, and medical history. The wireframe translates these into a user-friendly digital interface that offers estimated appointment times and provider details, ensuring a seamless patient experience from start to finish. This project demonstrates my UX/UI design capabilities and proficiency in using wireframing tools for digital healthcare solutions.

The wireframes represent the following screens:

- QR code scanner:** A screen with a large square area for a QR code and a "TAP TO SCAN" button at the bottom.
- Landing Screen:** A screen with a "Welcome to CarePlus!" message, a "Press the button below to begin the check-in process" instruction, and a "CHECK-IN" button.
- Patient Consent Form:** A screen titled "CONSENT FORM" with a large text area for consent, a "I consent" checkbox, and "Cancel" and "Next" buttons.
- Patient's Personal Details Screen:** A screen titled "Personal Details" with input fields for First Name, Last Name, Mobile No, Address Line 1, Address Line 2, City, State, and Pin Code, along with "Cancel" and "Next" buttons.
- Emergency Contact Screen:** A screen titled "Emergency Contact" with input fields for First Name, Last Name, Mobile No, Address Line 1, Address Line 2, City, State, and Zip Code, along with "Cancel" and "Next" buttons.
- Billing Information Screen:** A screen titled "Billing Information" with input fields for Name on card, Card Number, Mobile No, Expiration Date, Security Code, and Zip Code, along with "Cancel" and "Next" buttons.
- Medical Details Screen:** A screen titled "Medical Details" with input fields for Blood Group, Medical Allergies, Medical Devices you carry, and Current Medication, along with "Cancel" and "Review and Submit" buttons.
- Success Message Screen:** A screen with a large green checkmark icon, the text "Appointment Scheduled", and a success message: "Success! Your appointment has been booked with Dr. Ananya Raja for 3:00 PM CST, 22nd March, 2024". It includes an "Exit" button.
