WORK EXPERIENCE

Texas A&M University

Product Manager - Graduate Assistant

Remote - College Station, Texas, USA

Jan 2024 – Present

- Led an **Agile team** in the **end-to-end development** and timely delivery of the Alumni Network Platform by conducting stakeholder interviews and surveys to define system needs, product features, ensuring feature alignment and delivering the platform 2 weeks ahead of schedule.
- Drove **platform adoption** by 150+ users in the first month through **targeted outreach (email, LinkedIn)**, prioritized feature releases in **Jira**, and launching an interactive alumni directory, profile creation & event registration system.
- Improved product stability and readiness for launch by working with **QA** to eliminate 95% of critical defects pre-release and partnering with marketing to create **data-driven onboarding materials, leading to increased feature adoption**.
- Collaborated with the **UI/UX** team to create **wireframes** and user flows, ensuring an intuitive design for the Alumni Network Platform that streamlined user navigation and improved engagement.

DDI

Product Manager Intern

Pittsburgh, Pennsylvania, USA

May 2023 – Aug 2023

- Led **market research** and **user testing**, conducting 20+ buyer interviews to uncover **user pain points** and preferences, directly shaping product development and refining **pricing models** for the leadership development subscription.
- Collaborated on the launch of a new leadership development subscription package, **leveraging Gen AI to tailor personalized learning paths**, resulting in a 15% increase in subscription renewals and a 12% increase in overall revenue.
- Conducted a comprehensive **market research project**, analyzing **over 20 competitors** and **interviewing 50+ users** to design and launch a **global market survey with 100+ organizational responders**, improving customer satisfaction.

Gupshup

Product Engineer

Bangalore, Karnataka, India

Jan 2022 – Aug 2022

- Launched new **AI-driven conversational features**, such as personalized product recommendations and automated customer support, for an AI-based digital assistant product, resulting in a 21% increase in client engagement in the e-commerce sector.
- Designed and integrated **REST APIs** into the AI chatbot ecosystem, enabling seamless data exchange between **microservices** for real-time customer interactions.
- Optimized **CI/CD pipelines** using **Jenkins**, reducing deployment time by 17% and ensuring faster rollouts of conversational AI features.
- Created and executed a **comprehensive A/B testing strategy with detailed UI/UX design specifications**, leading to a 15% increase in user satisfaction and 10% boost in conversion rates for the digital assistant software.

Xebia

Software Developer

Gurgaon, Haryana, India

Jan 2019 – Dec 2021

- Owned the **integration of behavioral analytics and journey tracking** into financial web applications, driving a 20% increase in user engagement and 10% increase in customer retention.
- Conceptualized and **led a cross-functional team in an agile environment** for the deployment of financial web applications on cloud, resulting in 20% improvement in deployment efficiency through automated testing and continuous integration practices.
- Coordinated with stakeholders to **transition key applications from monolithic architecture to microservices**, reducing system downtime by 25% and improving scalability and performance.
